

Pouya (Hossein) Salimi

Software engineer

+989363687468 | [Email](#) | Shiraz, Iran | [Linkedin](#)

Summary:

Results-driven Senior Software Engineer with +15 years of experience in designing, developing, and scaling high-performance web applications. Expert in Laravel, PHP, Next.js, Docker, and modern API development. Proven ability to lead technical teams, architect scalable solutions, and deliver complex projects from concept to production. Strong focus on clean code, best practices, automation, and AI integration. Passionate about mentoring developers and driving technical excellence.

Professional Experience:

Senior Software Engineer

Noowex – Remote (Tehran, Iran)

Sep 2024 – March 2026

- Designed and developed a **high-performance Meta (Instagram) API service** using **Next.js** (frontend) and **Laravel 12** (backend), enabling automated DM handling and page visitor messaging.
- Integrated **AI capabilities** to enhance automation and reliability of messaging workflows.
- Implemented full **Docker** environment and collaborated closely with CI/CD engineers for streamlined deployment.
- Conducted thorough **code reviews** of AI-generated code, enforcing best practices, security standards, and community guidelines.
- Created comprehensive **API and technical documentation** for internal and external developers.

Senior Software Engineer

EWMAteam – Remote (Türkiye)

May 2022 – June 2024

- Led the design and implementation of **scalable, high-performance software architectures** for multiple projects.
- Provided technical leadership and mentorship to a team of **4+ developers**, improving code quality and delivery speed.
- Conducted regular code reviews, enforced coding standards, and organized training sessions.
- Managed task allocation based on team strengths, resulting in optimal resource utilization and on-time project delivery.

- Promoted Agile methodologies and fostered a collaborative environment with cross-functional teams (Development, QA, Product).
- Owned technical documentation, debugging processes, and architectural decision-making.

Technical Lead

mosbatesabz.com – Remote (Tehran, Iran)

December 2021 – March 2022

- Owned end-to-end architecture and technical design of the company's main platform and applications.
- Defined technical specifications for APIs and data acquisition processes.
- Mentored developers on **clean code practices, Laravel/PHP**, Agile workflows, UI/UX, and SEO standards.
- Conducted technical interviews and strengthened system infrastructure documentation.

Technical Lead

avalpardakht.com – Hybrid (Shiraz, Iran)

April 2021 – November 2021

- Led architecture, design, and implementation of company-wide platforms and applications.
- Dockerized the main project for consistent local development environments.
- Implemented DevOps practices including **Git Flow, Sentry, Jira**, and monitoring tools.
- Improved system stability, scalability, and performance through new features and infrastructure enhancements.

Team Lead / Backend Developer

doctoreto.com – Hybrid (Shiraz, Iran)

March 2020 – March 2021 (Team Lead) | June 2019 – March 2020 (Backend Developer)

- Led backend development using **Laravel** and JSON APIs; converted mockups into fully functional web applications.
- Stabilized production services, fixed critical bugs, and implemented new business-growing features.
- Prepared progress reports, managed risks, and minimized resource waste through proactive issue resolution.
- Conducted technical interviews and maintained comprehensive project documentation.

Full Stack Developer

Various Companies (rahnama.se – Remote Stockholm | Shiraz)

November 2012 – June 2019

- Developed multiple full-stack applications using **PHP, Laravel, Node.js, jQuery**, and **WordPress**.

- Supervised development teams in building a **Shopping/Service system** and a **Ticketing system**.
- Introduced Agile methodologies and best practices, significantly improving development processes.
- Performed code reviews, troubleshooting, and performance optimization.

Technical Skills:

- **Backend:** Laravel (8+ years), PHP (10+ years), Node.js, RESTful APIs
- **Frontend:** Next.js, JavaScript, jQuery, AngularJS, Bootstrap, CSS
- **DevOps & Tools:** Docker, Git, CI/CD, Jira, Sentry, Git Flow, Elasticsearch
- **Databases:** MySQL, MariaDB, MongoDB
- **Methodologies:** Agile, Unit Testing, Clean Code, Code Review, Technical Documentation
- **Other:** AI Integration, WordPress, SEO, UI/UX Best Practices

Education:

Bachelor of Engineering in Computer Engineering

Azad University – Shiraz, Iran

2009 – 2012

Languages:

- **English:** B2 (IELTS 6)
